

ACCEPTABLE USE OF INFORMATION TECHNOLOGY RESOURCES

Date: 11/6/2008

Revision Date:

LOGAN TOWNSHIP FIRE SERVICE SUGGESTED OPERATING PRACTICES

Section:

Page 1 of 7

1 **PURPOSE:**

2 To establish a policy regarding the acceptable use of Information Technology Resources for Logan
3 Township Fire Service members and volunteers.

4
5 **RESPONSIBILITY:**

6 It is each individual's responsibility to comply with this policy. Failure to do so will result in disciplinary
7 action, up to and including termination.

8
9 **PROCEDURE:**

10 This is the Logan Township Fire Service's "Acceptable Use Policy" (AUP). Please read the policy
11 carefully. While our direct connection to the Internet offers an array of potential benefits, it can also open
12 the door to some significant risks to our data and systems if we do not follow appropriate security
13 discipline. A computer systems user can be held accountable for any breaches of security or confidentiality
14 resulting from his/her use of the Departments information resources or Internet connection.

15
16 The Logan Township Fire Service information technology systems provide access to the vast information
17 resources of the Internet to help you do your job, provide software resources, and complete applicable
18 forms and reports related to the fire service. The facilities that provide access represent a considerable
19 commitment of Department resources for networking, telecommunications, software, storage, etc.

20
21 This AUP is designed to help you understand our expectations of the use of those resources and help you
22 use those resources wisely.

23
24 While we have set forth explicit requirements for computer and Internet usage below, we would like to start
25 by describing our AUP philosophy. First and foremost, the computers and Internet connection provided by
26 this Department are business tools provided to you at significant cost. That means the Department expects
27 you to use your computer access for Department-related purposes (i.e., to complete reporting, communicate
28 with other fire/EMS agencies, citizens, to research relevant topics and obtain useful Department-related
29 information), except as outlined below. We insist that you conduct yourself honestly and appropriately on
30 the computer system, and respect the copyright, software licensing rules, property rights, privacy and
31 prerogatives of others, just as you would in any other business dealings. All existing Department policies
32 apply to your conduct on the computer system and Internet, especially (but not exclusively) those that deal
33 with intellectual property protection, privacy, misuse of Department resources, sexual harassment,
34 information and data security, and confidentiality.

35
36 Unnecessary or unauthorized computer usage causes network and server congestion. It slows other users,
37 takes away from work time, consumes supplies, and ties up printers and other shared resources. Unlawful
38 computer usage may also garner negative publicity for the Department and expose the individual fire
39 departments to significant legal liabilities.

40
41 The chats, newsgroups, and e-mail on the Internet give each individual computer user an immense and
42 unprecedented reach to propagate the Department messages and tell our story. Because of that power we
43 must take special care to maintain the clarity, consistency, and integrity of the Departments corporate
44 image and posture. Anything any one individual writes in the course of acting for the Department on the
45 Internet could be taken as representing the Department's corporate posture. The guidelines below are, in
46 part, to ensure that any and all communications which could be attributed to the Department are
47 appropriate.

48
49 While our connection to the Internet offers numerous potential benefits, it can also open the door to some
50 significant risks to our data and systems if we do not follow appropriate security discipline. As presented
51 in greater detail below, that may mean preventing machines with sensitive data or applications from
52 connecting to the Internet entirely, or it may mean that certain users must be prevented from using certain

Page 2 of 7

53 Internet features. The overriding principle is that security is to be everyone's first concern. Department
54 members can be held accountable for any breaches of security or confidentiality.

55

56 DETAILED AUP PROVISIONS:

57

58 A. Definitions. For purposes of this policy, terms used should be interpreted expansively to include
59 related concepts.

60

61 (1) "*Internet*" includes the Department's in-house system, the World Wide Web, and e-mail.

62

63 (2) "*Department*" refers to The Logan Township Fire Service as a whole, the five individual
64 Logan Township Fire Departments, and the Logan Township Volunteer Fireman's Relief Association
65 either collectively and independently.

66

67 (3) "*Department Equipment*" includes the Department's computer hardware, software,
68 facilities, network, Internet facilities, services, and all other computing resources provided either locally or
69 remotely.

70

71 (4) "*Electronic Communication*" shall mean any transfer of signs, signals, writing, images,
72 sounds, data, or intelligence of any nature transmitted in whole or in part by a wire, radio, electromagnetic,
73 photo electronic, or photo optical system. This term includes the so-called HTML files read in an Internet
74 browser, any file meant to be accessed by a word processing or desktop publishing program or its viewer,
75 or the files prepared for the Adobe Acrobat reader and other electronic publishing tools.

76

77 (5) "*Graphics*" includes photographs, pictures, animations, movies, or drawings.

78

79 (6) "*Display*" includes monitors, flat-panel active or passive matrix displays, monochrome
80 LCDs, projectors, televisions, and virtual-reality tools.

81

82 (7) "*User*" includes any Department member.

83

84 (8) "*Network Management Team*" is the identified committee of personnel that are appointed
85 by the Fire Chiefs Association and the Logan Township Volunteer Fireman's Relief Association to manage
86 the Logan Township Fire Service Information Technology systems.

87

88 B. No Expectation of Privacy.

89

90 (1) Department Equipment shall be used for Department business and is not for personal use,
91 with limited exception as set forth herein. Because Department Equipment can only be used for
92 Department business, the Department considers itself to be a party to any communication utilizing
93 Department Equipment.

94

95 (2) The Department has the right to access, monitor, and intercept any Electronic
96 Communication during transmission where the Department is a party to the communication, and shall have
97 such right where an employee of the Department is a party and has given the Department prior consent of
98 such access, pursuant to the Electronic Communications Privacy Act, 18 U.S.C.A. § § 2510 to 2522 (1997).

99

100 (3) As the provider of the Department Equipment and related Electronic Communication
101 services used by the employees of the Department, the Department shall have access to all Electronic
102 Communications stored on the Department Equipment, pursuant to the Stored Wire and Electronic
103 Communications Act, 18 U.S.C.A. § § 2701 to 2711 (1997).

Section:

Page 3 of 7

105 (4) As a result of the above, no employee of the Department shall have any expectation of
106 privacy with respect to Electronic Communications transmitted, received or stored on, by or through the
107 Department Equipment. The Department will review activity and analyze computer usage patterns. It may
108 choose to publicize this data to assure that Department computer resources are devoted to maintaining the
109 highest levels of productivity.

110
111 (5) The Department retains the rights to any material posted to any forum, newsgroup, chat
112 room or World Wide Web page by any member or volunteer using Department Equipment.

113
114 (6) Any software or files downloaded via the Internet into the Department network is the
115 property of the Department. Any such files or software may be used only in ways that are consistent with
116 their licenses or copyrights.

117 C. Personal Use.

118
119
120 (1) Users of Department Equipment are expected to exercise good judgment and ensure that
121 all Electronic Communications are appropriate, professional and courteous, and not in violation of any
122 Department policy, or of any local, state, or federal law. The Department will not exercise editorial control
123 by assuming responsibility to seek out and eliminate defamatory, obscene, or incidental materials; however,
124 if such Electronic Communications, either during transmission or as stored on Department Equipment,
125 comes to the Department's attention, the individual responsible shall be subject to discipline pursuant to the
126 rules and procedures of the Department. The Department does not assume responsibility to exercise
127 editorial control over any of the content of Electronic Communications and shall not act as a "publisher" of
128 such materials.

129
130 (2) Because a wide variety of materials may be considered offensive by colleagues, citizens,
131 or suppliers, it is a violation of Department policy to store, view, print, or redistribute any document or
132 graphic file that is not directly related to the user's job or the Department's business activities.

133
134 (3) Employees with Internet access must take particular care to understand the copyright,
135 trademark, libel, slander, and public speech control laws of all countries, so that personal use of the Internet
136 does not inadvertently violate any laws, which might be enforceable against the Department.

137
138 (4) Computers may be used for personal interest on a limited basis, as described below. In
139 some instances, Department Equipment may be provided to an employee for use in the home or outside of
140 Department facilities. Personal use of Department Equipment is subject to the following conditions:

141
142 a. Personal use of Department Equipment shall not interfere with the operations of
143 the Department. Department Equipment shall not be used to promote political agendas or to obtain any
144 financial gain or avoid financial detriment that would otherwise not be available but for the employee's
145 position. It is recognized, however, that due to the nature of the fire service schedules, limited personal use
146 of Department Equipment is allowed. To the extent that expenses are incurred by the Department for
147 personal use, the Department shall be promptly reimbursed for such expenses at the rate such services are
148 generally available to the public, regardless to the actual cost to the Department.

149
150 b. While on station, users may utilize computer resources to prepare applications
151 for desired Department positions, to type a social letter, prepare educational documents, play computer
152 games described below, and Department-related course work.

153
154 c. In the interest of keeping employees well-informed, use of Internet news
155 briefing services is acceptable while on station.

156

157 d. No user may utilize Department computer resources to maintain personal
158 financial records, operate an outside business, or participate in any malicious activities.

159 e. Internet games and Personal games may not be loaded on Department systems.
160 This included Internet based games or activities where files need to be installed onto the Department
161 computer to allow the games to run. Games that come with the Windows operating system may be used.
162 Department owned or licensed games created to teach knowledge or skill needed for Department positions
163 may be used.
164

165 (5) Electronic communications will not contain offensive material. It is prohibited to
166 transmit any inflammatory material; material with abusive language; sexually, culturally, or racially
167 offensive or insulting material; or obscene, vulgar, or profane materials.
168

169 (6) The display of any kind of sexually explicit image or document on any Department
170 system is a violation of Department sexual harassment policies. In addition, sexually explicit material may
171 not be archived, stored, distributed, edited, or recorded with Department Equipment.
172

173 (7) The Department may use independently supplied software and data to identify
174 inappropriate or sexually explicit Internet sites or e-mail. The Department may block access from within
175 Department networks to all such sites known. If a Department user accidentally connects to a site that
176 contains sexually explicit or offensive material, he or she must disconnect from that site immediately,
177 regardless of whether that site had been previously deemed acceptable by any screening or rating program.
178

179 D. General Guidelines.

180 (1) Department Equipment must not be used to violate the laws and regulations of the United
181 States or any other nation, or the laws and regulations of any state, city, province, or other local jurisdiction
182 in any material way. Use of any Department resources for activity illegal under the laws of any jurisdiction
183 is grounds for immediate loss of membership, and the Department will cooperate with any legitimate law
184 enforcement and/or prosecutorial activity.
185

186 (2) Department Equipment may not be used to download or distribute pirated software or
187 data.
188

189 (3) Department Equipment may not be used to propagate any virus, worm, Trojan horse, or
190 trap-door program code.
191

192 (4) Department Equipment may not be used to disable or overload any computer system or
193 network, or to circumvent any system intended to protect the privacy or security of another user.
194

195 (5) Each user of Department Equipment shall identify him or herself honestly, accurately,
196 and completely (including one's Department affiliation and function where requested) when participating
197 in chats, conference, or newsgroups, or when setting up accounts on outside computer systems.
198

199 (6) Only those users who are authorized to speak to the media at public gatherings on behalf
200 of the Department may speak/write in the name of the Department to any newsgroup, conference, or chat
201 room. Other users may participate in newsgroups or chats in the course of business when relevant to their
202 duties, but they do so as individuals speaking only for themselves. Where an individual participant is
203 identified as a volunteer of this Fire Department, the member must refrain from the unauthorized
204 endorsement or appearance of endorsement by the Department of any commercial product, political
205 position or candidate.

Section:

Page 5 of 7

209 (7) Users are reminded that chats and newsgroups are public forums where it is unlawful to
210 reveal confidential Department information, including patient data. Users releasing such confidential
211 information via a newsgroup or chat, whether or not the release is inadvertent, will be subject to discipline
212 as per the departments SOP's.

213
214 (8) Use of Department Equipment to commit infractions such as misuse of Department assets
215 or resources, sexual harassment, unauthorized public representation of Department, and misappropriation
216 of intellectual property is prohibited by Department procedures and will be sanctioned under the relevant
217 provisions of the respective governing SOP's.

218
219 (9) Members using Department Equipment with Internet access may download only software
220 with a direct business purpose and must arrange to have such software properly licensed and registered.
221 Downloaded software must be used only under the terms of its license.

222
223 (10) Members with Internet access may not use Department Equipment to download images
224 or videos, unless there is an express business-related use for the material.

225
226 (11) Members with Internet access may not upload any software licensed to the Department or
227 data owned or licensed by the Department without the prior written permission of the Network
228 Management Team.

229
230 E. Technical.

231
232 (1) Any downloaded file must be scanned for viruses before it is run or accessed.

233
234 (2) The Department will maintain keys, combinations, and passwords to all computer
235 hardware, software, and information created and/or stored on Department provided systems. All such
236 information created and/or stored on these systems shall be considered Department property and is subject
237 to inspection. Personal computer programs are not to be installed or used on Department computers
238 without prior written permission of the Network Management Team.

239
240 (3) No privately owned device may be connected to Department Equipment, registered to the
241 department domain, or connector to Department phone lines without prior written authorization of the
242 Network Management Team. The exception would be if there are specific provisions made for such
243 connections. i.e. Wireless access made available for general use of private laptops, ect.

244
245 (4) Users may encrypt their e-mail and files with the use of software with prior written
246 authorization of the Network Management Team.

247
248 F. Security.

249
250 (1) Department Equipment is protected from unauthorized access and use by passwords and
251 other security measures. The security measures recognize that information is exempt from Public Record
252 Disclosure, and that the integrity of the business of the Department must be safeguarded. All users are
253 advised that the use of a password does not give rise to any right of privacy, and that passwords must not be
254 disclosed to unauthorized users. Users also are advised that the use of the deletion keystroke does not
255 necessarily mean that a record, communication, or document has been eliminated from the system.

256
257 (2) User ID's and passwords help maintain individual accountability for computer resource
258 usage. Any user who obtains a password ID for a computer resource from the Department must keep that
259 password confidential. No one should use the ID or password of another, nor should anyone provide his or
260 her password to another. The user may need to work with the Network Management Team to troubleshoot
261 problems from time to time, but if the user's password is shared in the course of this process, the user

Section:

Page 6 of 7

262 should immediately change such passwords to regain the exclusive knowledge of same. The Network
263 Management Team will be responsible for setting up and tracking of user accounts and system operation
264 and configuration. The Network Management Team shall be the only group authorizing system or
265 configuration changes to Department owned and operated equipment.

266

267 (3) The Department has installed an Internet firewall to assure the safety and security of the
268 Department's network. Any user who attempts to disable, defeat, or circumvent any Department security
269 facility will be subject to immediate loss of membership.

270

271 (4) Only those Internet service and functions with documented purposes for this Department
272 will be enabled at the Internet firewall.

273

274 (5) Whenever a user is done using the computer resource for a particular session, he or she
275 shall always logout of all systems to be sure to maintain system and user security.

276

277 (6) All users will be required to maintain a password of a certain complexity and will be
278 required to change this password at a pre-determined interval to ensure and maintain system security.

279

280 G. Obtaining Access.

281

282 (1) Department members or volunteers wishing to obtain a user account will contact their
283 department IT representative and supply the required information needed to create an account. All users
284 will be required to sign and return an acknowledgement sheet that they received and understand the Logan
285 Township Fire Service AUP for Department IT resources. Once the Department IT contact has this form,
286 they will provide instructions, a username, and temporary password for the user to access the IT systems.

287

288 (2) The Department IT Team will routinely evaluate the need for user's access and disable
289 accounts with no activity, or members no longer associated with the fire service.

290

ACKNOWLEDGMENT

I, _____, acknowledge that I have received a written copy of the Logan Township Fire Service Acceptable Use Policy. I understand the terms of this policy and agree to abide by them. I understand that the Department may record and store for management use the electronic communications I send and receive, the Internet address of any site that I visit, and any network activity in which I transmit or receive any kind of file while using or connected to a Department computer or resource. I also understand and consent to the Department's right to access, monitor, and intercept any electronic communication to which I am a party during transmission. I understand that any violation of this procedure could lead to my discipline, including dismissal from the Department and criminal prosecution.
